SS MINI MIGHT MULCHER

MADE IN THE USA

Why Advanced Forest Equipment?

- Our forestry mulchers are engineered by a contractor, for contractors!
- All of our operations are under the same roof.
- Our service department personnel are operators with first hand experience in the field, so when you call you know you are talking to an expert.
- You can always count on AFE when it comes to parts. We have parts readily available to ship.

Our Focus:

- To provide the best quality forestry mulchers by only using the best materials.
- To provide excellent service to our customers.
- To have all the parts you need, at all times.
- Safety! Please note, matching up the right mulching attachment to a specific carrier will determine how well the mulcher package will function in your region. Skid steer manufacturers don't always have safety guarding and/or safety windows on their products, so we highly recommend reviewing your machine first, before purchasing a forestry mulcher.

CALL US AT: 1-866-772-0999 OR VISIT US AT: WWW.ADVANCEDFOREST.COM

SAFETY FIRST REMINDER: Do not run any mulching attachment on an open cab machine or on a carrier with tempered glass front window. OEM Polycarbonate window is required when operating any mulching attachment, please see your dealer for OEM Polycarbonate window. We highly recommend utilizing other enhanced safety guarding such as cab guards and steel front window screens. Please call us for more information regarding enhanced safety guarding. Advanced Forest Equipment not responsible for misuse of attachment. DO NOT operate mulching attachment while anyone is within 300 ft.

SS MM MULCHER

MADE IN THE USA

OVERVIEW

The SS Mini Might is the only forestry mulcher that can run on standard flow machines. Not only can this skid steer mulcher cut material smoothly and quickly, it can mulch it as well! A few unique features on SS Mini Might skid steer mulcher:

Ease of Maintenance: There are no belts, pulleys or shivs; our systems are direct drive, the power goes directly into a bearing box transferring 100% of the power to the cutting disc. We have a rubber safety coupler between the hydraulic motor and bearing box to protect from damage.

Reduction Shroud System: The unique design of the reduction shroud system forces the material into the fixed cutting teeth which then allows you to mulch and re-mulch if you desire. The SS Mini Might has provisions to enhance performance when running on machine with 25-32 GPM by simply removing the bolt on reduction plate located in the intake reduction shroud. Please contact us if you have questions regarding this feature. **SPECIFICATIONS MAY CHANGE AT ANYTIME.** The SS Mini Might mulcher attachment is designed for use on skid steers of up to 12,000 pounds ONLY!

Reduction plate can be removed to enhance production when running a machine with a 25-32 GPM

Now including a Maintenance Kit with every mulcher purchase, a \$690 value for free!

“Just a contractor who wanted a better skid-steer

SS MM MULCHER

MADE IN THE USA

BENEFITS:

Durability: Tough, rough and built to last. All handcrafted, tested and made with pure material; no recycled nor refurbished materials used.

Visibility: Being able to see the material as it engages with the cutting disc; this allows the operator to avoid unwanted foreign material.

Versatility: Each SS Mini Might comes with a universal skid steer mounting plate. Recommended to only use on skid steers with 20-32 GPM.

Productively: Can mulch up to 4" depending on hydraulic flow of carrier.

FEATURES:

Bearing Box—Custom built, ROBUST, TOUGH and DURABLE. This is the heart and soul of this mulcher! Each bearing box is tested prior to shipping.

Hydraulic Motor—108CC Sunfab Bent axis piston motor.

Cutting Disc— 44" in diameter; Made of Weldox 700, T-1 steel.

Reduction Shroud System—The reduction shroud is designed to work with the disc in a seamless process of cutting and mulching trees. The unique design of the reduction shroud system controls debris in the field while mulching. The material is pulled into the reduction shroud and the mulched material is expelled back into the mulching path for further treatment if desired.

Cutting Teeth—Comes with beaver teeth and carbide thumbnail teeth. The **Carbide Thumbnail Tooth** are designed for durability and placed at the bottom of the cutting disc to handle the tough environment.

SS MINI MIGHT MULCHER SPECIFICATIONS

HYDRAULIC FLOW	20 to 32 GPM
HYDRAULIC PRESSURE	Up to 5,000 PSI
HYDRAULIC MOTOR	Bent Axis Piston Hydraulic Motor (European with 1-year warranty) Anti-Cavitation production, 1-inch supply line from the ant-cavitation manifold to the hydraulic motor
BEARING BOX	Oil bathed bearing box, synthetic oil, bearings are self-aligning, heat treated 4-inch shaft, Direct Drive System with isolator coupler
CUTTING DISC	Made of Hardox 700 T-1 steel (30% stronger than mild steel), 1' ¼ thick, 44-inches in diameter
CUTTING TEETH	(12) Beaver teeth (28) Carbide thumbnail teeth
MOUNTING	Adapter plate is a universal skid steer mounting plate
CASE DRAIN LINE	Case Drain Line Required, MIN. 5/8" (Not Included)
REDUCTION SHROUD	63" Across
PRODUCTIVITY-AVG.	Softwoods up to 4" productivity, depending on hydraulic flow of carrier
DIMENSION	66" L x 53" W x 45" H
WEIGHT	1,724 LBS
HOSES	Hoses not included
DISCLAIMER	<i>SPECIFICATIONS MAY CHANGE AT ANYTIME.</i> The SS Mini Might mulcher attachment is designed for use on skid steers of up to 12,000 pounds ONLY!
